

Document scanner "scan to email" functionality, combined with MxHero and Box, is a powerful document management solution. Documents of all types, such as, invoices, purchase orders, student applications, can be scanned, analyzed and auto-filed to the correct folders at the touch of a button.

The mxHero Advantage

- No additional hardware or software required
- Works for all scanners with "scan to email"
- No end user downloads or training
- API for integrating with external data sources
- No need for end user logon to Box

Product Spotlight

- Intelligent auto-filing to Box based on scanned content
- Complete cloud-based service
- Central control via web based Administration Panel
- Automatic security & governance of scans

Intelligent Scanning

MxHero and Box make a perfect solution when combined with any printer capable of scanning to email. Configure content scanning rules in MxHero's web dashboard and have scanned documents automatically filed to the correct folder in Box.

Powerful regular expression system allows streamlined processes like:

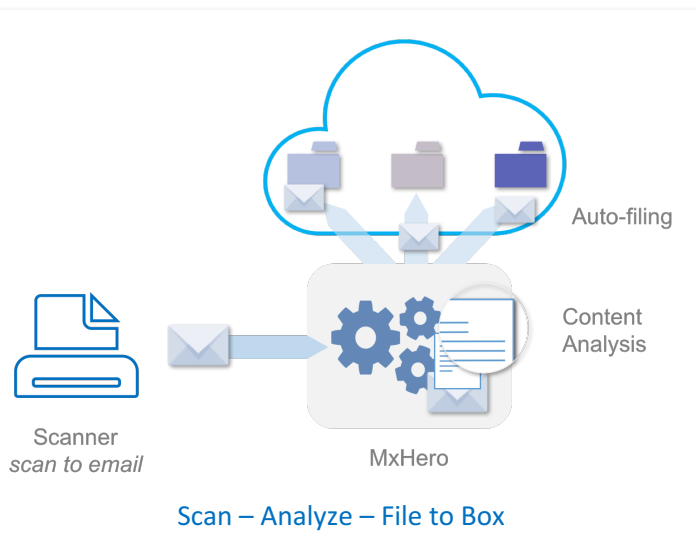

- Invoices, Purchase Orders filed per client
- Self-sorting loan, job, student applications
- Auto-Filing documents by matter or project based on specific content
- and much more...

Easy - no login required

Since mxHero is authenticated during setup, scanner users are saved the extra step of authenticating to Box. MxHero can save scanned content to a single Box account or each user's individual Box account. Users just press scan.
